

# STAN SCHULTES

## Innovation Guidance, Smart Cities, and Agile Strategies

Stan Schultes brings a strong background designing and implementing global enterprise software architectures (IDEAS: Innovation, Design and Engineering Automation Systems), he specializes in integrating disparate systems to create highly reliable and resilient solutions, and he has a knack for making the complex simple.

### Innovation Architect

His current interests have an economic development edge – guiding Smart Cities strategies, developing place-specific Innovation Districts, integrating Internet of Everything (IoE) solutions, and in nurturing entrepreneur ecosystem development and mentoring startups. He is co-producing Smart City Innovation Accelerators, bringing together city decision makers and industry partners, with the Innovators Forum out of the Technology and Entrepreneurship Center at Harvard (TECH).

- Smart Cities guidance and Innovation Districts development
- Open data architecture and integrations, cloud services, data analytics
- Tech scouting (matching needs with solutions) and tech platform evaluation
- Teaches agile strategies, innovation process and design thinking
- Facilitates & guides multi-disciplinary teams using agile, collaborative techniques

Internationally recognized as a technology expert, Stan has earned the coveted Microsoft MVP award yearly since 2004. He is a book author, tech columnist, conference speaker, and has co-produced a technical webcast series and an internet TV show. As an engineer, professional technologist, entrepreneur, and business strategist, he has led multi-disciplinary teams from the Fortune 100 to stewardship of several startups. He is certified by InBIA in Business Incubator Management and is a certified expert in Strategic Doing with the Purdue Agile Strategy Lab.
